KYROS TECHNOLOGIES

CAPABILITY OVERVIEW

# Secure. Resilient. Uncompromising.

## Service-Disabled Veteran-Owned Small Business

Kyros Technologies LLC helps federal organizations and teaming partners design and operate secure, resilient mission infrastructure. Our approach brings technical precision, disciplined architecture, and decisive execution to complex environments.

### CORE CAPABILITIES

Secure infrastructure and cloud architecture; mission systems and integration; cybersecurity and compliance readiness; data, AI, and workflow automation.

### THE UNCOMPROMISING WAY

**Clarity over chaos.** Turn demanding technical requirements into systems teams can understand, operate, and trust.
**Precision through Zero Trust.** Apply identity-centered controls and micro-segmentation to reduce implicit trust.
**Resilience by design.** Build continuity through automation, Infrastructure-as-Code, and repeatable engineering.

### TEAMING & PROCUREMENT

Contact our team to discuss mission requirements, partnership opportunities, and current procurement information. This overview does not represent a contract award or assert a specific certification or contract vehicle.
